

Rules Solution

The OWIT Rules Solution is at the heart of all OWIT's microservices. The OWIT Rules Solution supports the configuration and interpretation of business rules, which are easily customizable to any carrier-specific situation, tolerance, or line of business, to determine a direction or decision.

- Business logic uses incoming data and a sequence of operations to carry out the business rules
- Used as a standalone solution or as a component which can be integrated into existing environments

Rules Solution

At the Heart of the Solution

- Rules Service to support any logic and business rule execution

MICROSERVICES USED

Rules Service

- Ensures regulatory compliance
- Sophisticated decision logic
- Fully customizable
- Continuous integration and delivery process

Login Service

- Enables single sign-on
- Secures data access
- Provides two-factor authentication
- Supports integration (SSO) to any platform

Party Management Service

- Centralizes entities and relationships management
- Manages entity data information from entry into a realized product
- Parties available for use by realized product
- Associates users of OWIT microservices with single party entity

OWIT Global (OWIT) is an insurance technology company specializing in solutions built on a unique suite of reusable insurance-specific microservices. OWIT's solutions include Bordereaux and Binder Management, Business to Business/Consumer Portals, User and Point of Sale Portals, Rating, Document-lite Generation, Insurance Data Transformation, and Policy Lifecycle. Each OWIT solution is built on a collection of microservices that allow for unprecedented reusability to deliver an array of additional solutions to solve pressing pain points for both immediate and longer-term business benefits. OWIT's solutions can be deployed standalone or integrated with a Broker's, Carrier's, or MGA's existing environment to maximize investments.

OWIT Global's offering is configured and managed through a "no-code" environment. All user experiences, workflows, rating calculations, and rules are configured through a no-code tool. The tools come with embedded data fields, insurance workflows, and in the case of integration, connectors that can all be configurable and changed to meet individual insurer needs.

We have an experienced technical team with years of insurance technology experience. Whether you need an experienced resource to help with requirements gathering or a software team to develop long-term or one-off technology projects, our team is available to assist. Our resources will design and configure efficient software solutions for a variety of business needs.
