

Bordereaux Management Solution

The OWIT Bordereaux Management Solution simplifies the creation, distribution, absorption, and analysis of Bordereaux data while delivering significant time savings and dramatically improving efficiencies and data accuracy.

- Quickly analyze portfolio performance across risk level and claims data
- Easy-to-read, graphical dashboards

At the Heart of the Solution

- Orchestrates the Bordereaux process
- Monitors submissions and reconciles data across premium, cash and claims submissions
- Extract Translate Load (ETL) Service for mapping, data extraction, data cleansing, and loading
- Rules Service for workflow logic and business rules execution

MICROSERVICES USED

Bordereaux Service

- Automates data cleansing, mapping, and importation
- Unifies extracted data
- Supports multiple output formats
- Policy, Claims and Cash processing

ETL Service

- Aggregates records within given parameters
- Metadata and SME knowledge
- Detects system overload to avoid crashes
- Rapid workflow implementation

Rules Service

- Ensures regulatory compliance
- Sophisticated decision logic
- Fully customizable
- Continuous integration and delivery process

User Experience Service

- Allows drag-and-drop configurations
- Add links, maps, and payments
- Existing legacy integration
- Interacts with distribution channels

Analytics Service

- Conduct policy, risk or coverage level incurred vs. earned analysis
- Identify patterns or trends in claims and risk portfolio
- Track data thresholds
- Customize and share dashboards or real-time reports

MICROSERVICES USED

Integration Service

- Better system communication
- Ensures software sync and processing
- Connects legacy to other systems
- Pre-built integrations to existing third-party provider database

Rating Service

- Supports any insurance line of business
- Provides rate/rule configuration
- Integrates easily and rapidly
- Increases new product speed to market

Login Service

- Enables single sign-on
- Secures data access
- Provides two-factor authentication
- Supports integration (SSO) to any platform

Party Management Service

- Centralizes entities and relationships management
- Manages entity data information from entry into a realized product
- Parties available for use by realized product
- Associates users of OWIT microservices with single party entity

OWIT Global (OWIT) is an insurance technology company specializing in solutions built on a unique suite of reusable insurance-specific microservices. OWIT's solutions include Bordereaux and Binder Management, Business to Business/Consumer Portals, User and Point of Sale Portals, Rating, Document-lite Generation, Insurance Data Transformation, and Policy Administration. Each OWIT solution is built on a collection of microservices that allow for unprecedented reusability to deliver an array of additional solutions to solve pressing pain points for both immediate and longer-term business benefits. OWIT's solutions can be deployed standalone or integrated with a Broker's, Carrier's, or MGA's existing environment to maximize investments.

OWIT Global's offering is configured and managed through a "no-code" environment. All user experiences, workflows, rating calculations, and rules are configured through a no-code tool. The tools come with embedded data fields, insurance workflows, and in the case of integration, connectors that can all be configurable and changed to meet individual insurer needs.

We have an experienced technical team with years of insurance technology experience. Whether you need an experienced resource to help with requirements gathering or a software team to develop long-term or one-off technology projects, our team is available to assist. Our resources will design and configure efficient software solutions for a variety of business needs.
